

Module 11

Vulnerability assessments

Written by Jeff Charlton 08700 789 999

This module takes you through methods of identifying vulnerabilities and threat assessments. It covers common hazards and also provides a basis for horizon scanning and the development of strategies.

It explains historic differences between old risks and new vulnerabilities. It shows ways to accommodate threat and vulnerabilities in straightforward action plans.

The module explains vulnerabilities in:

- Building defence
- Security management
- Protection of personnel
- Hazard Response
- Business Continuity
- Day to day risks.

The module also provides an insight into audits and reviews.
